MARINE SERVICES

AUTUMN WORKS

PREPARE. PROTECT. PRESERVE

As the weather turns, get your vessel ready for winter with our seasonal care package.

BILGE CLEANING

Each bilge is meticulously degreased and every fluid extracted, leaving all accessible areas perfectly dry. A pristine bilge reveals any trace of oil leakage or water ingress at the earliest opportunity.

MOISTURE ABSORBERS

We place moisture absorbers in cabins and saloons to keep mould, mildew, and musty smells at bay. It's a low-cost way to protect your upholstery through the damp months.

FUEL STABILIZATION

We treat your tanks with a quality fuel stabilizer to guard against diesel bug, keep fuel fresh, and protect the fuel system from sludge, blocked filters, and corrosion.

FULL INTERIOR VALET

A top-to-bottom interior clean: vacuuming, polishing timberwork, and wiping down all surfaces, cupboards, cookers, fridges, windows, heads, and galley.

FULL EXTERIOR VALET

A gentle wash, deck scrub, and light teak scrub, with lockers, fenders, and brightwork all attended to. Everything is dried by hand to prevent water spotting, and a protective spray wax is applied to the GRP for a lasting, lustrous finish.

TEAK CLEANING & RESTORATION

A specialist two-stage treatment lifts away ingrained grime and renews weathered teak, restoring its natural warmth and helping it endure for years to come.
